EDUCATION

SRM Institute of Science and Technology, Delhi-NCR Campus	<i>Expected August 2029</i>
<i>Bachelor of Technology (B.Tech), Computer Science Engineering</i>	
• Coursework: Object-Oriented Programming (OOP), Data Structures & Algorithms (Introductory), Data Management.	
Delhi Public School Indirapuram	<i>Graduated 2025</i>
<i>All India Senior School Certificate Examination (Grade 12th PCM)</i>	Percentage: 85.0%
Delhi Public School Indirapuram	<i>Graduated 2024</i>
<i>All India Secondary School Examination (Grade 10th)</i>	Percentage: 94.6%

TECHNICAL SKILLS

Languages:	C++, Python, SQL, TypeScript, German (Conversational), Hindi (Native), English (Fluent)
Cloud & Infra:	Google Cloud Platform (GCP), Firebase, Google Cloud Storage, Cloud Shell, Linux/Unix Command Line
Tools & Frameworks:	React, Node.js, Firestore, Google AI Studio, Vertex AI, Gemini API, Git, GitHub, Amazon Alexa Skills Kit

TECHNICAL PROJECTS

BlueShift AI AI Productivity Companion	<i>June 2026</i>
<i>Technologies: React, TypeScript, Node.js, Firebase, Firestore, Google Cloud, Gemini API, Google AI Studio</i>	
• Built an AI-powered productivity companion for the Google Developers Vibe2Ship Hackathon to help users proactively complete work before deadlines. • Designed an intelligent planning system that converts high-level goals into personalized roadmaps with milestones, daily tasks, and adaptive scheduling. • Integrated Gemini AI to generate execution plans, prioritize tasks, provide proactive recommendations, and predict goal completion probability. • Implemented Firebase Authentication and Cloud Firestore for secure user management and real-time data synchronization. • Integrated Google Workspace services, including Google Calendar and Google Tasks, to streamline scheduling and task management. • Deployed the application using Google AI Studio and Google Cloud, delivering a fully functional web application with end-to-end AI-powered workflow automation.	
Object-Oriented Contact Management System	<i>December 2025</i>
<i>Technologies: C++, File Handling, Git</i>	
• Accomplished a terminal-based contact management architecture as measured by 100% data persistence across execution sessions by designing an optimized file-handling engine in C++. • Reduced lookup latency by 99% under peak load by replacing sequential file scanning with an optimized binary search algorithm ($O(\log n)$) leveraging structured Object-Oriented Programming (OOP) encapsulation. • Engineered clean code modularity to securely process dynamic CRUD operations against a stress-test benchmark of 10,000+ mock records with zero memory leaks or buffer overflows.	
Voice-Activated AI Assistant	<i>November 2025</i>
<i>Technologies: Python, Amazon Alexa Skills API, Natural Language Processing</i>	
• Accomplished an interactive voice integration workflow as measured by successful multi-turn conversation intent matching by building a custom skill endpoint during the Hands-on AI Workshop at SRM. • Optimized request parsing pipelines using cloud integration protocols to drastically minimize latency and eliminate voice-to-action execution lag.	

EXPERIENCE & HACKATHONS

Google Developer Group (GDG) TechSprint Hackathon

January 2026

Participant | SRM Institute of Science and Technology

- Accomplished rapid minimum viable product (MVP) design under a strict 48-hour deadline as measured by successful cross-platform project validation by a Google Developer Group evaluation panel.
- Collaborated within a multidisciplinary technical squad to architect data collection workflows, utilizing cloud resources to achieve continuous high uptime during the final pitch presentation.

LEADERSHIP & ENGAGEMENT

Indirapuram Toastmasters Club

December 2025 - Present

Executive Member / Public Speaker

- Accomplished personal leadership development milestones as measured by receiving the "Star of the Month" and "Best Speaker Award" over 2+ competitive voting cycles against active club members.
- Delivered structured technical and narrative presentations utilizing advanced rhetoric, expanding audience engagement indicators across regional community meetups.

Gamers Creed SRM

November 2025 - Present

Public Relations (PR) Team Member

- Accomplished scalable student engagement campaigns for campus gaming tournaments by engineering targeted outreach, promotional materials, and multi-channel community updates.
- Coordinated with a core PR division of peers to balance brand messaging, scaling the gaming collective's overall active enrollment footprint.

HONORS & CERTIFICATIONS

- Selected Attendee, Design Fusion Build With AI Workshop GDG Cloud New Delhi / Google Gurugram (June 2026)
- Technical Cohort Invitee, Google Cloud Best of Next '26 Asia Pacific (May 2026)
- 1st Position Winner, TechMeme Tryst'26-IIT Delhi Technical Festival (March 2026)
- Google Cloud Certified Badge, Store, Process, and Manage Data on Google Cloud (December 2025)
- Academic Workshop Credential, Artificial Intelligence & Machine Learning Workshop Techgyan / R&I Park, IIT Delhi (August 2025)
